Total Cost	\$650

Note: These components can **not** be separated.

4. Time Period

The time period for development, installation and testing is **1** month.

5. Additional Notes

The technology used in the **Rapidfire Content Management System** is PHP, MySQL and Perl. If your current Web Host does not support this technology then it may require the web site be located on a web server that supports this technology. Luke Media uses and recommends Connect Infobahn. You may view their pricing schedule at www.host1.com.au.

To run the **Rapidfire Content Management System** you will need Internet Explorer 5.0 or above. We recommend you use Internet Explorer 5.5.

6. Total Cost with Standard Installation

The total costs for the rebuild, re-design and re-architecture of the **oxleynets.com.au** website would be: **\$1,650**

7. Disclaimer

All prices and advice provided in this quote were correct at the time of printing. However please be aware that as circumstances change prices may also change.
