

Enabling SSL on your iPhone

To Enable Incoming Email SSL

1. From the Home screen, tap Settings.
2. Tap Mail, Contacts, Calendars and choose the desired email account.
3. Tap Advanced.
4. From the Incoming Settings menu, slide Use SSL to ON.
5. Tap Server Port and make the following change:
6. IMAP – **993** or POP – **995**

7. Tap Save.

To Enable Outgoing Email SSL

1. From the SMTP menu, tap the primary outgoing server for the account. This will be the server name assigned to your domain.
2. Next to Use SSL, tap ON.

3. Tap Server Port and change the port to 465.
